

CCEWOOL® Bio soluble fiber yarn

Description:

Bio-soluble ceramic fiber yarn is yarn-shape high-temperature products which composed of soluble fibers blended with certain percentage organic bulk, reinforced with fiberglass or inconel wire.

Characteristics:

New type of low-carbon, environmental friendly and energy-saving product; no pollution or carcinogenic material was included.

Good thermal stability, unaffected by thermal shock.

Block infra-red radiation, good corrosion resistance.

Good fiber flexibility

Biogradable, industrial wastes do not have to deal with.

Application:

Stitching fireproof cloth.

Technical data and specification

CCEWOOL® Bio soluble fiber yarn (Inconel Wire Reinforced / Glass Fiber Reinforced)	
Standard size	Tex: 525-2250
Common size	Tex: 525, 630, 780, 830, 1000, 2250
Color	Bluish
Temperature	1100-1300°C
